- ▶ VHS Liaison provides support and training to the Learning Coach
- ▶ Comprehensive course registration services & support
- ▶ Technical support for students, parents & administrators

# Full-Time Online Learning for High School Students

## New State Laws for Virtual Learning

More states are adopting programs to make virtual school options available to public school students. Parents and students are choosing these full-time virtual schools because they offer more choices and options for learning. As students move away from brick and mortar schools, districts may lose control over the quality of the education provided to their students as well as the associated state funding.

## Full-Time Online Program Overview

School districts, education collaboratives and home school families can now offer part-time or full-time online options to their own students. Students may take some or all of their classes online through VHS when classes are approved by the students' school or by an education collaborative in which the students' school district participates.

VHS will work closely with the school's Learning Coach to determine the full-time online program and program of studies that best meets the needs of your student.

The Virtual High School full-time online program is an accredited solution for students who need an alternative to the traditional classroom environment. We provide the following resources so students can graduate and find success:

### High Quality Courses

VHS offers nearly 200 high-quality courses including core, electives, Honors and Advanced Placement®, that are 100% online, providing anytime, anywhere access for your students.

### Superior Instruction

VHS teachers are experienced, 85% hold a master's degree, and they average 15 years of teaching experience. All have completed a rigorous graduate-level training program prior to being certified to teach a VHS course.

### Proven Technology

Our technology platform allows students to learn and communicate with teachers and classmates easily and effectively in a safe, secure environment. We provide dashboards on student progress so you can monitor your student's achievements in class.

### Stellar Support

Our customer support team and curriculum staff are available for any questions you might have. Simply call us or submit a service ticket on our website and we will respond quickly to your request.

### School/Parent Responsibilities

- ▶ Identify and screen students for appropriateness for a full-time online program.
- ▶ Manage federal, state and district specific academic standards for grading, testing, portfolio, issuance of credit, and special needs requirements.
- ▶ Provide full responsibility for student support services (i.e. guidance, transportation).
- ▶ Provide a Learning Coach to manage technical and administrative aspects of VHS, and serve as the primary contact between their students, their school, and VHS faculty and staff.

### For More Information

---

**The Virtual High School** has created a full-time online program for high school students. This program is designed to meet the educational objectives of districts and collaboratives wanting to retain control over the quality of the education and the funding their high school students receive.

With VHS, your school district and home schooled students now have another option.

We partner with home school families and with school districts to provide students with the ability to go to high school online, receive critical support services, AND graduate with their class.

The Virtual High School is an educational nonprofit consortium committed to expanding opportunities for students and teachers through collaborative online and blended education. In addition to full-time online learning, for more than 15 years, VHS has partnered with schools and districts nationwide to expand their offerings.
